Summary

Computer Science undergraduate with a solid background in programming, databases, and problem-solving. I am eager to apply my skills in a role where I can contribute to meaningful projects and continuously improve my technical and analytical skills.

Skills

Languages: Python, MySQL, Java, C, HTML, CSS, React, JavaScript.
Concepts: Data Structures and Algorithms, OOPs, DBMS.
Soft Skills: Problem Solving, Logical Thinking, Time Management, Teamwork.

Problem Solving and Coding Practice

Solved 400+LeetCode problems across Data Structures and Algorithms, SQL, arrays, strings, linked lists, trees and various concepts for strengthening my problem-solving skills.

Projects and Practical Experience

Smart Waste Segregation and Awareness Assistant for Visually Impaired Students

- Designed a smart assistive system concept to help visually impaired students identify and segregate waste using non-visual guidance in school environments.
- Collected and prepared a custom dataset of 1,200+ real-world waste images commonly found in school environments to improve classification performance and real-world usability.
- Classified waste items into biodegradable, recyclable, and non-biodegradable categories based on model predictions for accurate automated segregation.
- Developed and trained a lightweight image classification model using MobileNetV2 for efficient and accurate waste identification in real-world scenarios.
- Currently working on edge deployment and integration with Raspberry Pi, audio output, and tactile feedback modules. To support accessible, non-visual interaction for visually impaired users**.**

CGPA Calculator and Task Management System

- Built to help students easily compute their academic performance based on their grades. The calculator allows users to input their grades for each subject and calculates their Cumulative Grade Point Average.
- Designed and developed a Task Management System to organise and track daily activities, project workflows, and deadlines. (HTML, CSS, JS).

Tourism Management Portal

- Developed a Tourism Management Portal with features like tour booking, user management, and an integrated admin dashboard using PHP, HTML, CSS, and JavaScript.
- Designed the admin dashboard to manage bookings, users, and packages directly within the site.

Education

B.E: **Computer Science And Engineering**, Expected in June 2026.
Sathyabama Institute of Science And Technology - Chennai
CGPA: 8.01

Certifications

- **NPTEL** - DSA with Python, Database Management System, Programming in Java.
- **COGNIBOT-** Machine Learning.
- **IBM** – Artificial Intelligence Fundamentals.
- **SIMPLELEARN –** JavaScript.
